

Legislation Alerts

Legislation Alerts on Westlaw® Edge UK enables you to track commencement, amendment and citing information for provisions of legislation.

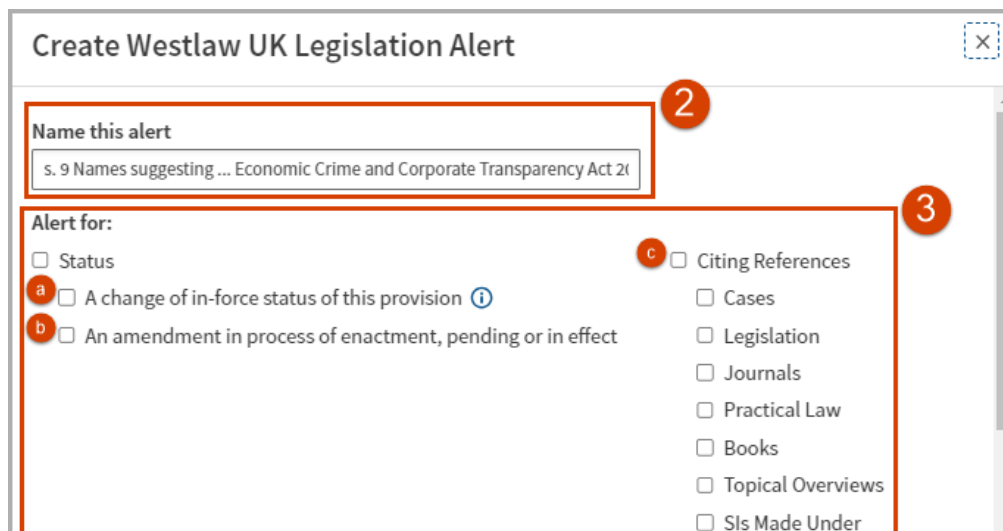

Setting up a Legislation Alert

1. Access the relevant legislative provision and click the bell icon on the right.

The screenshot shows the Westlaw Edge UK interface. The top navigation bar includes 'History', 'Folders', 'Favourites', 'Alerts', 'CoCounsel', and 'Sign out'. The main content area displays the 'Economic Crime and Corporate Transparency Act 2023 c. 56' with section 's. 9 Names suggesting connection with foreign governments etc'. A red box highlights the bell icon in the top right corner of the document view, with a '1' next to it.

2. By default, the name of the Alert is the provision number/name and the Act title, but you can enter a name of your choice.
3. You can set the alert for:
 - a. A change in the in-force status. This will include any commencement information being updated – dates published and a provision coming partially/fully into force.
 - b. A change in amendment information. This will include amendments proposed (by draft legislation or bills), amendments pending, amendment information being updated, or coming into effect.
 - c. When this provision is cited by another document. You can select some or all citing references.

The screenshot shows the 'Create Westlaw UK Legislation Alert' dialog box. It has a title bar with a close button. The main area contains a text input field for 'Name this alert' (callout 2) and a section titled 'Alert for:' (callout 3). Under 'Alert for:', there are three columns of checkboxes: 'Status' (with sub-options 'a' and 'b'), 'Citing References' (with sub-option 'c'), and a list of document types: 'Cases', 'Legislation', 'Journals', 'Practical Law', 'Books', 'Topical Overviews', and 'SIs Made Under'.

4. Once you have made the relevant selection, enter in the email address(es) of the recipient(s).
5. The *File format* enables you to select whether the results are in the body of the email (Inline HTML) or as an attachment.
6. The *What to Deliver* option enables you to receive a list of developments and references, or the full documents of citing references.
7. The Alert will automatically check daily for developments. You can change the time of day the alert runs. You will only receive an alert if there is a development or citing reference.
8. Click Save Alert to finalise setting up the Alert.

The screenshot shows a 'My Contacts' alert configuration window. At the top right, it says 'My Contacts' with a group icon. The 'Email address' field contains 'maresa.botha@thomsonreuters.com' and is marked with a red circle '4'. Below it, the 'File format' dropdown is set to 'Inline HTML' and is marked with a red circle '5'. The 'What to Deliver' section has 'List of Items' selected with a radio button and marked with a red circle '6', while 'Documents' is unselected. The 'Alert at this time' section is marked with a red circle '7' and shows 'The alert will be delivered daily' with a time dropdown set to '10:00 AM' and a location dropdown set to '(GMT+00:00) Dublin, Edinburgh, Lisbon, London'. At the bottom, there are three buttons: 'Save Alert' (highlighted with a red circle '8'), 'Cancel', and 'Go to Alert Centre'.
